SURAJ SHANKAR MADANE

Pune, Maharashtra | +91-9284395390 | surajmadane8392@gmail.com | linkedin.com/in/surajmadane80 | github.com/SurajM80

EDUCATION

Pimpri Chinchwad University (PCU), Pune 2023 – 2027
Bachelor of Technology in Computer Science Engineering — Specialization: AI & Data Science | CGPA: 8.3 / 10

Fergusson College, Pune 2021 – 2023
Higher Secondary (HSC)

TECHNICAL SKILLS

ML Frameworks: Regression, Classification, Scikit-learn, XGBoost, Statistical Modelling

Programming: Python (Pandas, NumPy, Scipy, Matplotlib), SQL (Advanced: CTEs, Window Functions), C++

Data Engineering: ETL Pipeline Design, MySQL, REST API Integration, Data Wrangling

Visualization & Databases: Power BI (DAX, Power Query), Matplotlib, Seaborn, Tableau (Foundation)

Tools & AI: Git, Docker, VS Code, Agentic AI (LangChain, RAG)

WORK EXPERIENCE

Agentic AI Intern — Internal Digital Transformation Team June 2026 – Jul 2026
CCTech

- Architected and implemented an end-to-end automation framework for internal business processes, migrating manual Excel-based workflows into Zoho Desk as the centralized database and process management platform.
- Collaborated with cross-functional stakeholders to gather requirements and translate departmental workflows into scalable, automated system designs.
- Gained hands-on experience with the LangChain framework, applying it to explore agentic workflow design and LLM-based automation concepts.

Data Science Intern May 2025 – Jul 2025
Skillfield Mentors

- Conducted EDA on high-dimensional datasets using Python to identify key variance drivers.
- Applied Pandas, Matplotlib, Seaborn libraries for data processing and visualization.
- Leveraged Excel and Python to identify a 15% accuracy improvement in internal reporting.

Independent Business Associate Mar 2023 – Mar 2024
Bada Business, Pune

- Contributed to revenue generation, achieving a maximum of nearly ₹200K INR.

KEY PROJECTS

Production-Ready ETL Pipeline & BI Dashboard Python, MySQL, Power BI

- Engineered a Python-based ETL pipeline fetching live data via REST APIs; handled data integrity with SQLAlchemy.
- Implemented robust error handling and INSERT IGNORE logic for automated daily data ingestion.
- Visualized executive KPIs in a customized Power BI dashboard.

Supply Chain Predictive Analysis (Brazilian E-Comm) SQL, Power BI

- Analyzed 99K+ orders using SQL window functions to identify logistics bottlenecks and delivery delay risks.
- Segmented customers and regions to optimize shipping routes, proposing a potential 10% reduction in lead times.

ACHIEVEMENTS & PUBLICATIONS

- IDEATHON 2.0 Organizing Committee (Hackathon)

CERTIFICATIONS & COMMUNITY

- Career Essentials in Data Analysis (Microsoft/LinkedIn)
- AWS Academy Cloud Foundation (AWS)
